

BASF Construction Chemicals España, S.L.

**MasterSeal CR 171 (old Masterflex 700 FR PG)
LEED Product Declaration**

MasterSeal CR 171 is a pourable two component polysulphide-based joint sealant to be used as an effective seal against potentially waterpolluting substances in refueling areas at filling stations for example, with a high chemical resistance to wide variety of substances.

We hereby confirm,

1. that during the production process of **MasterSeal CR 171** no toxic substances as formaldehyde, asbestos, lindane, chlorinated biphenyls, pentachlorophenol or other forbidden substances are used.
2. the following VOC-content (VOC up to 280°C) of less than 25 g/l according to "SCAQMD Rule 1168 for Adhesives and Sealants" (IEQ Credit 4.1: Low-Emitting Materials and Sealants; VOC Limit: 250 g/l)
3. that the product deliberately does not contain any of the exempt compounds of SCAQMD 102
4. that the product should be assumed to be 0% of post-consumer material recycled content from the normal recovery of raw materials in manufacturing processes.
